

CORRIGENDUM

Corrigendum to “Visible light-assisted photodegradation of 2,4-dinitrophenol using  $\text{Ag}_2\text{CO}_3$  loaded phosphorus and sulphur co-doped graphitic carbon nitride nanosheets in simulated wastewater” [Arab. J. Chem. 13(1) (2020) 3196–320]

The authors regret that the SEM images presented in Figs. 1a, 1b, 1c and 1d were provided with the wrong sequences in the manuscript. After a review of the original data, the authors regret that due to an error during figure preparation in the version of this article initially published, the incorrect SEM images were inadvertently used to represent the morphology of GCN, PGCN, SGCN, and PSGCN photo-

catalyst in Figs. 1a, 1b, 1c and 1d. The corrected Figs. 1a, 1b, 1c and 1d appear below.

The authors state that this error does not affect the interpretation of the conclusion of any results presented in the article. The authors would like to apologise for any inconvenience caused.
