# Computational methods

## 1. Conformational analysis

Conformational analysis for compounds **1a–3a** were performed in Yinfo Cloud Platform (<https://cloud.yinfotek.com/>) using systematic algorithm by Confab<sup>[1]</sup> at the MMFF94 force field with a RMSD threshold of 0.5 Å and an energy window of 7 kcal/mol.

## 2. ECD calculation

The theoretical ECD calculations were carried out using GAUSSIAN 09. At first, all conformers were optimized at PM6. Room-temperature equilibrium populations were calculated according to the Boltzmann distribution law (错误!未找到引用源。), based on which dominative conformers of population over 1% were kept. The chosen conformers were further optimized at the B3LYP/6-31G(d) in gas phase. Vibrational frequency analysis confirmed the stable structures. ECD calculations were conducted at the B3LYP/6-311G(d,p) level in acetonitrile with a CPCM model using the Time-dependent Density functional theory (TD-DFT). Rotatory strengths for 11/4 (**1a**), 2/4 (**2a**), and 8/4 (**3a**) excited states were calculated. The ECD spectrum was simulated using the ECD/UV analysis tool in Yinfo Cloud Computing Platform (<https://cloud.yinfotek.com/>) by overlapping Gaussian functions for each transition according to (2).

$$\frac{N_i}{N} = \frac{g_i e^{-\frac{E_i}{k_B T}}}{\sum g_i e^{-\frac{E_i}{k_B T}}} \quad (1)$$

where  $N_i$  is the number of conformer  $i$  with energy  $E_i$  and degeneracy  $g_i$  at temperature  $T$ , and  $k_B$  is Boltzmann constant.

$$\Delta\varepsilon(E) = \frac{1}{2.297 \times 10^{-39}} \times \frac{1}{\sqrt{2\pi\sigma}} \sum_i^A \Delta E_i R_i e^{-\left(\frac{E-E_i}{2\sigma}\right)^2} \quad (2)$$

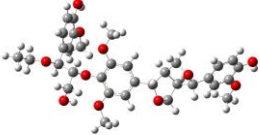

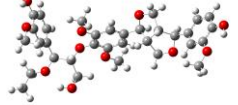

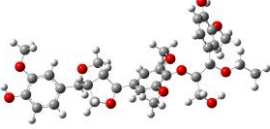

where  $\sigma$  represents the width of the band at  $1/e$  height, while  $\Delta E_i$  and  $R_i$  are the excitation energies and rotatory strengths for transition  $i$ , respectively.

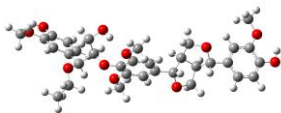

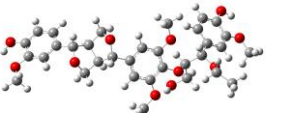

The  $\sigma$  and UV-shift values were set 0.49/0.27 eV and 13/10 nm (compound **1a**), 0.13/0.21 eV and -30/-5 nm (compound **2a**), and 0.2/0.32 eV and 9/10 nm (compound **3a**), respectively.
